PROFILE

Hello! I am Angel, a passionate engineering student with a strong focus on programming, software development and product management. I am currently immersed in my academic journey, exploring the complexities of engineering and acquiring valuable skills in the world of programming and technology.

EXPERIENCE

FOUNDER AND LEADER OF CUACKERSTUDIOS
AUGUST 2023 - PRESENT

Parque Tecnoógico Orión, Tecnológico de Monterrey

In addition to my studies, I co-founded and lead CuackerStudios, an emerging video game development startup born from a university club. I coordinate multidisciplinary teams of engineering students to design, prototype, and publish original games. We focus on creating collaborative workflows, and are currently expanding into branding and distribution strategies.

JUNIOR SOFTWARE ENGINEER
JUNE 2024 - DECEMBER 2024

AutoZone BTSSC, Chihuahua, Chih.

My primary focus was on translating requirements into functional code. Additionally, I was in charge of designing the user interfaces for an application for internal use of the company. I also participated in the design of the database and in the programming of the frontend and in auxiliary tasks of the backend.

JUNIOR WEB DEVELOPER
NOVEMBER 2023 - MARCH 2024

Leading Tech, Chihuahua, Chih.

As a Junior Web Developer at Leading Tech, I was part of a dynamic and collaborative team focused on developing enterprise technology solutions. I contributed to the design, implementation, and maintenance of web applications using cutting-edge technologies such as AngularJS and NestJS.
